

MonLines Fire Protection Enclosure for Monitors

Description

The high-quality fire protection enclosure provides reliable protection for sensitive equipment and meets the highest standards of safety and functionality. The robust housing is made of non-combustible A1-rated material in accordance with DIN EN 13501-1 and is available in various RAL color finishes. For optimal visibility of the installed equipment, the enclosure is fitted with a durable toughened safety glass (ESG) viewing panel. An integrated VdS-certified extinguishing cartridge ensures fast and reliable fire suppression in the event of fire or smoke. The extinguishing agent used is non-toxic and leaves no residue, enabling fire suppression without damaging the protected equipment. In addition, the fire protection enclosure features a VdS-compliant power shut-off system that is automatically activated in the event of an incident, providing an additional layer of safety and complementing the overall protection concept.

Key features

- Robust sheet steel enclosure made from non-combustible A1-rated material in accordance with DIN EN 13501-1
- Custom color finish available in any RAL color shade
- Toughened safety glass (ESG) with high impact and break resistance
- Integrated VdS-certified extinguishing cartridge
- Automatic fire detection in the event of smoke or fire development
- Non-toxic, residue-free extinguishing agent that suppresses fire without damaging equipment
- VdS-compliant automatic power shut-off for enhanced operational safety
- Optimal protection for sensitive electronics and digital signage systems
- Supplied without monitor
