

## MonLines built-in TV lift

### MLS035B, MLS036B, MLS037B, MLS038B

### Description

The MonLines electric TV lift for raising and lowering offers an elegant and space-saving solution for concealing your television in furniture, walls, or special cabinets. With just the push of a button, the screen can be raised or lowered gently and quietly – ideal for living rooms, bedrooms, conference rooms, or yachts where technology should be stylishly integrated into the interior. The high-quality lifting system impresses with reliable and low-maintenance drive technology and a sturdy construction. The lift is suitable for a wide range of TV sizes and allows continuous height adjustment via remote control or integrated switch. Installation is quick and easy – either in furniture such as sideboards, wardrobes, or beds. With its sleek design and sophisticated mechanics, this TV lift is particularly well-suited for custom interior design projects. Whether in upscale residential architecture or in professional presentation environments – the system ensures a tidy look while protecting the television from dust, impact, or unauthorized access.
