

MonLines MRH002

Swivel Monitor mount for tubes (28-60 mm) up to 8 kg

Description

The MonLines MRH002 embodies a versatile solution within the realm of monitor mounts crafted for columns and tubes. Tailored specifically for screens boasting an impressive size of up to 32 inches and a weight capacity of up to 8 kg, this mount provides an array of customisable features that extend a comprehensive suite of functions for positioning the display optimally. The remarkable flexibility of this monitor mount is apparent through its swivel mechanism, affording users the capability to tilt the monitor or TV both upwards and downwards. An admirable attribute of this mount lies in its sturdy mounting ring, facilitating dependable installation onto cylindrical tubes or poles possessing a diameter of up to 60 mm. This renders it a particularly fitting selection for challenging environments like factory floors and manufacturing facilities where a robust means of screen support holds paramount importance. The process of affixing the MonLines MRH002 is exceedingly user-friendly, facilitated by the employment of clamping screws that firmly secure the bracket to the pipe or pole. MonLines – For your individual & functional needs.
