

MonLines MTH020B

Monitor desk mount electric 17 - 32 inches

Description

The MonLines monitor mount with eye-level height adjustment represents the next generation of ergonomic workplace design. It combines modern technology with maximum comfort and ensures a healthy, upright posture – completely automatically. Thanks to integrated facial recognition and a precise eye tracker, the monitor height automatically adjusts to the current eye position. A built-in motion sensor registers your sitting posture and corrects the screen height in real time, enabling relaxed working over longer periods. If necessary, the height can also be adjusted manually. The integrated inductive charging pad allows wireless charging of smartphones directly on the mount, ensuring a tidy, functional workplace. The mount is suitable for monitors up to 32 inches (81 cm) and, with 360° rotation and a lateral tilt of +/- 12°, offers complete flexibility for the optimal viewing angle. Two mounting options – desk clamp or adapter plate for permanent mounting – enable flexible or permanent installation. A sophisticated cable management system rounds off the overall concept and ensures additional order on the desk.

Key features

Screen size:	17"-32" (43-81 cm)
VESA standard:	75x75, 100x100 mm
Load capacity:	Max. 10 kg per screen
Height adjustable:	400-610 mm
Tilt:	+/-12°
Pivot:	+/-12°
Mounting options:	Mounting clamp (10-80 mm) and adapter plate for permanent installation
Inductive charging:	Wireless and convenient
