

MonLines MTH021B

electric dual monitor desk mount for 17-27 inches

Description

Experience ergonomic perfection at your workplace with the monitor mount for two monitors and eye-level height adjustment. This intelligent mount combines sturdy construction with modern technology, ensuring a healthy sitting posture and optimal visual comfort. The integrated eye tracker automatically adjusts the screens to your eye level, while a manual mode is available at any time. A practical extra is the integrated inductive charging pad, which allows smartphones to be charged wirelessly directly at your workstation – for a tidy desk without cable clutter. The mount is suitable for two monitors from 17"–27" (43–69 cm) and offers maximum flexibility: Both screens can be rotated 360° and tilted $\pm 12^\circ$ and rotated sideways to adjust the ideal viewing angle at any time. Two mounting options are available for maximum adaptability: either the practical clamp for desk thicknesses from 10–80 mm or the robust adapter plate for permanent screw fastening. Integrated cable management also ensures order and comfort at the workplace.

Key features

Screen size:	17"–27" (43–81 cm)
