

MonLines V089

VESA adapter for Apple iMac 24 inch

Description

Most Apple displays / all-in-one PCs like the iMac do not have a VESA screw hole pattern and therefore cannot be attached to a standard monitor mount. With the MonLines VESA adapter plate for iMac 24, an Apple iMac can be converted to a display with a VESA mount so that it can be attached to a monitor table mount or wall mount, for example.

For installation, the adapter is simply attached to the existing stand of the iMac 24 using the included screws and now has the VESA standard 100 x 100 mm. The MonLines VESA adapter is made of sturdy steel with a high-quality powder coating.
