

TabLines TWM001 magnetic tablet wall mount

Description

The magnetic wall mount for tablets TabLines TWM001 between 7 and 10,1 inches is optimized for attachment to metal surfaces. Thanks to the magnets on the back of the tablet holder, the holder is simply attached to the magnetic surface, e.g. fridge, pin board, and stays there. The iPad or Samsung tablet is inserted between the flexible and the fixed mounting rail and clamped there. The flexible rail allows an opening between 185 and 300 mm for the tablet. There is also a pen tray under the lower rail.

Alternatively, the bracket can also be mounted with screws; the installation material is enclosed. The mounting direction is fixed, but tablets of the appropriate size can be inserted in portrait or landscape format. Install your tablet wall mount where you need it and enjoy convenient operation.
