

TecLines TVS011B retractable 2-Way Power Socket with USB-A/C and Qi Charger

Description

The TecLines TVS011B retractable 2-way power socket with USB-A/C and Qi charger, black, is an elegant furniture power socket designed for modern interiors. Thanks to the pneumatic extension mechanism, the sockets can be accessed with just one movement. After use, the module can simply be retracted back into the worktop. The minimalist black housing blends seamlessly into modern office and kitchen furniture as well as worktops, creating a clean and tidy appearance.

The retractable power socket is equipped with two Schuko sockets (230V AC), USB-A+C ports with Power Delivery and Quick Charge 3.0 for fast charging, as well as a wireless Qi charger integrated into the top cover with a charging power of up to 15W. The wireless charger can be used both when the module is extended and when it is retracted into the worktop. Installation requires a prepared cut-out with a diameter of 75 mm and is suitable for worktops with a thickness of 5 to 52 mm. A minimum clearance of 400 mm is required below the worktop. The TecLines furniture power socket is ideal for desks, conference rooms, kitchens, and home office workstations.
