

Projector lift system (1mtr) PPL 1515

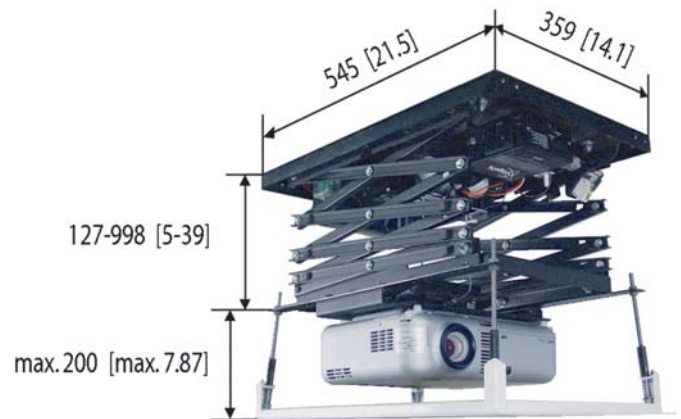

Specifications

- Max. weight: 15 kg / 33 lbs
- project.leaflet_minDistanceCeiling: 127 mm
- Guarantee: 2 years
- Available colours: Silver

PPL 1515 is a professional full automatic projector lift system, especially designed for use on high ceilings and/or easy projector servicing.

Projector lift system (1mtr) PPL 1515

The PPL 1515 projector lift system has a unique microprocessor controlled operation and height setting. The advantages are quick installation and very accurate height positioning. The built in self diagnostics continuously monitor the lift operation. PPL 1515 projector lift system has a whisper quiet operation and 3 height positions: home position, show position and service position. Connecting to a automation system as Crestron, AMX or others is easy with the included interface. The maximum drop down distance is 1 mtr.

PPL 1515 projector lift system includes:

- universal projector adapter
- ceiling finishing kit 40x60 cm
- open contact operation/control

Features

- Whisper-quiet operation
- Including universal projector adapter
- Electronic/remote height position settings.
- Three height positions, Home, Show and Service (Show and Service are programmable).
- High quality cable drum with pinch rollers, keeping the cables always in the same position and so preventing cable length variations.
- Cable off drum sensor.
- Remote control 1: Two 12V outputs for controlling external equipment.
- Remote control 2: Two 9-pin inputs for operation of all functions with eg. an AMX or Crestron automation system (use open, voltage free contacts).
- Remote control 3: One 12V input to operate the lift system with external 12V.
